NAIL-LAM COLUMNS

Engineered Strength. Built to Last.

Designed specifically for post-frame construction, NHC laminated columns deliver the strength, stability, and reliability builders depend on every day.

Features & Benefits

- ✔ All lumber is SYP #1. Treated portion is minimum .60 CCA.
- ✔ 3 ply, 4 ply, and 5 ply 2x6 and 2x8 columns are available up to 40'
- ✔ Top 18"–24" fastener-free for easy on-site trimming
- ✔ Plys are glued and nailed.
- ✔ Columns are planed on one side for a uniform fit.
- ✔ Optional: concrete base, brackets, or PoleSaver rot-prevention wrap

STRONGER

Engineered laminations provide greater strength and improved structural performance compared to traditional solid posts.

STRAIGHTER

Manufactured for consistent dimensions and reduced twisting, bowing, and warping.

LONG LASTING

Quality materials and precision manufacturing provide dependable performance for years to come.

Common Applications

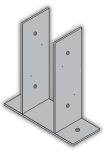

- Garages and Shops
- Commercial Buildings
- Decks and Pavilions

BUILT RIGHT. DELIVERED ON TIME.

Quality components. Exceptional service.

COLUMN OPTIONS

Size	Ply Options	Length Options	Lumber Options
2" x 6"	3-Ply, 4-Ply	Up to 36' (up to 40' on request)	Treated Bottoms Fully Treated Non-Treated
2" x 8"	3-Ply, 4-Ply, 5-Ply	Up to 36' (up to 40' on request)	

Base Options			
Concrete Bases	Drill Set Brackets	Wet Set Brackets	Pole Savers
10,000 PSI precast concrete bases designed to prevent pullout and provide a strong, reliable foundation for post-frame construction. 	Installs into existing cured concrete with a hammer drill and masonry bit. Secured with a concrete anchor kit. 	Embedded post brackets installed in wet concrete, providing maximum strength and long-term performance for new construction. 	Pressure-treated posts wrapped with PoleSaver® PF Protective Barrier to help prevent rot and extend post life with a 40-year warranty. 

BUILD WITH CONFIDENCE.

NHC Components works closely with builders and dealers to manufacture laminated columns to the exact specs of every project — engineered for strength, manufactured for consistency, and delivered with the service builders expect.
